Archrock is ready to help you solve your contract compression needs.

For more than 65 years, Archrock has built its reputation by reliably and safely providing contract compression services with the largest fleet of compression equipment in the United States. We are a company of natural gas compression experts, strategically combining technologies, products and services to provide exceptional service.

ARCHROCK HELPS MAXIMIZE UPTIME AND IMPROVE SERVICE AVAILABILITY BY OFFERING:

- Massive Inventory of compressor packages ready for deployment
- An experienced installation team that makes install efficient, convenient and safe, every time
- Highly skilled field service technicians optimizing performance and production
- Supply chain warehouses and full-service shops conveniently located near your operation
- Environmental services to assist with regulatory compliance
- Efficiencies at every step, benefitting your bottom line

GAS COMPRESSION SERVICES

Archrock was founded on providing natural gas compression services, and we have dedicated ourselves to this business for decades. This legacy has made Archrock the contract compression services leader in the U.S. We have the largest fleet in the country, operating over 3+ million horsepower. And with a presence in every significant producing region, Archrock has the compression services you need, where you need them.

Archrock delivers value, providing clients with the best gas compression services available. We can help keep both your gas and your revenues flowing. Moving gas is what we know. And as the leader in natural gas compression, it's what we do best. We provide gas compression services tailored to fit your specific operational needs.

We offer contract compression services for the following:

Gas Lift, Gas Processing, Gathering, Transmission and Storage.

**We Power
America.**

Efficiently.
Expediently.
Continuously.

THE CONTRACT ADVANTAGE

When you purchase your own gas compression equipment, you're spending capital. With a contracted compression solution from Archrock, you can free up that capital to invest in operations that will continue to grow your business and bolster your bottom line.

Contract compression services with Archrock also give you more flexibility in forecasting your overall operating expenses by locking in your compression-specific costs. Get the most for your compression investment and let Archrock install, operate, maintain, service and manage all of it for you. We will utilize the ideal compressor packages for your specific compression needs. Installation is safe, efficient and timely. The best-trained technicians are poised and ready to operate and maintain your compressor stations. With our **Target Zero™** safety program, Archrock strives for an incident-free workplace. Combined, these initiatives elevate your bottom line and maximize uptime. Explore what we offer here to see if a contract compression partnership is what your project needs.

UNMATCHED RELIABILITY

With contract compression services through Archrock, you can be completely confident in our unmatched expertise. And since the equipment is our asset, we maintain it meticulously and provide equipment selected to meet your performance goals. We maintain a pre-engineered fleet with upwards of 500,000 HP ready for rapid deployment. Plus, we have a new build program that continues to add equipment with the latest technology to our fleet, designed to support customer growth.

PerformX®

PERFORMX® ENGINE MANAGEMENT

Archrock adds a unique value to contract compression operations through PerformX, our proprietary engine management tool. Through PerformX we are able to track and provide performance data about every compressor in operation. This results in greater transparency into all issues surrounding service availability, safety and compliance, which allows us to proactively remedy potential problems.

This helps lower risks, maximize availability and keep production revenue flowing.

Through PerformX, we can also provide periodic reports that give a snapshot of service availability, compression service job sites units under contracted service, monthly issues encountered, HSE data and payment status. These reports cover all business site-specific snapshots of the contract compression services relationship.

UNRIVALED COMPRESSION SERVICES EXPERTISE

Archrock is the largest, most capable, most experienced and most trusted compression company in the U.S. For decades we have proven ourselves by delivering the highest levels of performance, helping clients turn well streams into revenue streams.

We're experts at compression services for any conditions. Plus we provide unmatched field service to get your operation running and keep it that way. We have more certified CAT technicians than anyone else, and to maximize uptime and support for Waukesha end users, Archrock now holds more genuine Waukesha parts inventory and has more technicians receiving expert training. Whatever your operation needs, we have the right resources to get the job done. Our unmatched experience in natural gas compression means no one can keep you operating at full capacity like Archrock.

READY WHEN AND WHERE YOU NEED US

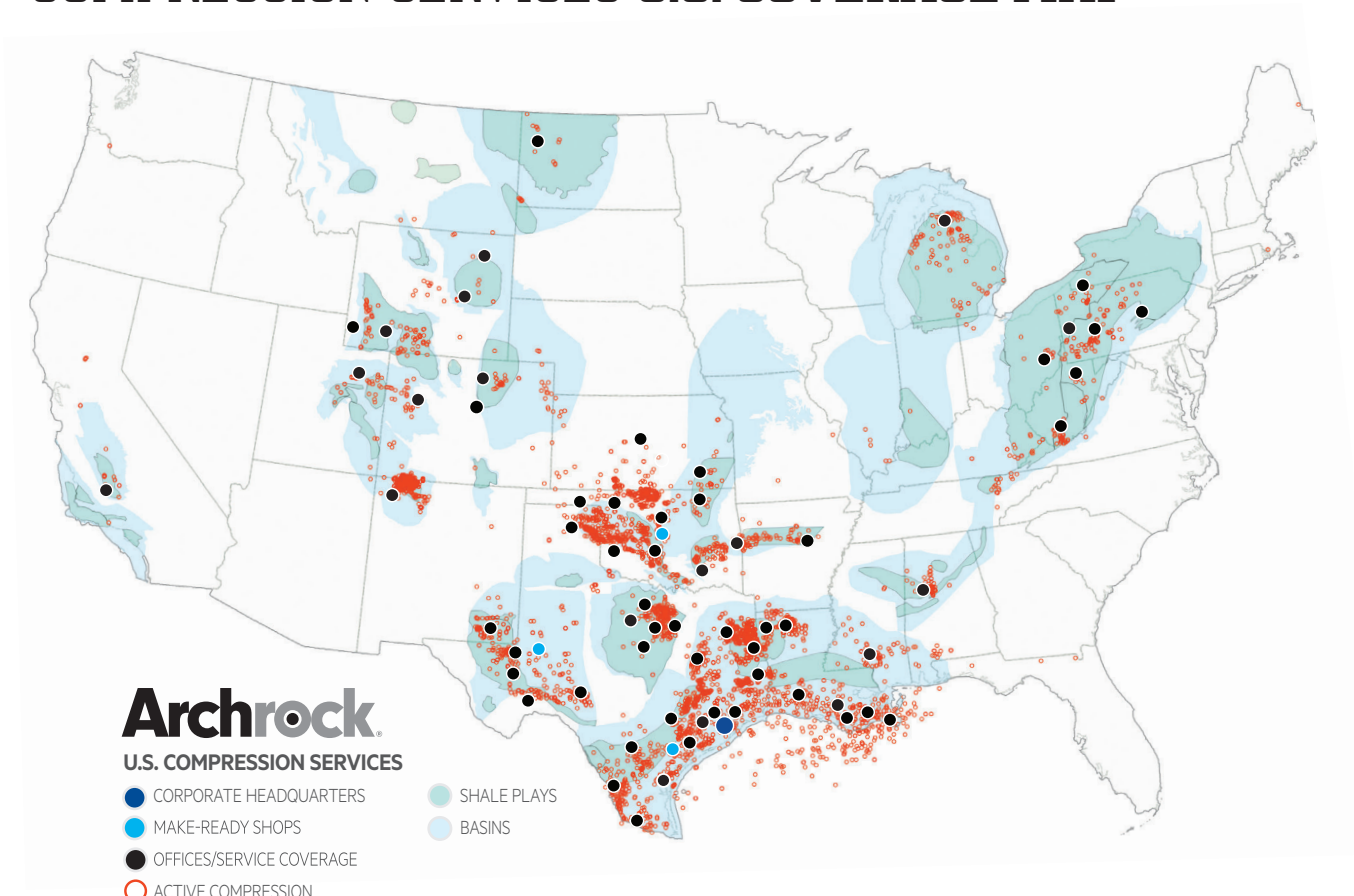

Archrock has an extensive fleet of more than 7000 compressor packages across the country to accommodate customer needs, the available equipment ranges from 55 to 4500 HP. Access to the latest compression technology is available from Archrock due to our strategic partnerships with Ariel, CAT, Waukesha and other industry leaders.

Archrock also has four make-ready shops across the country. These shops offer expertly trained, certified mechanics and plenty of space to configure, repair or modify even the largest compression equipment around.

SUPERIOR SERVICE

Archrock leads the industry in preventive and predictive maintenance practices with some of the industry's most qualified field service technicians, trained and certified by major OEMs including CAT, Ariel and GE Waukesha. Our team is focused on safety, environmental constraints, operating procedures and delivering excellent service. Archrock's safety performance ranks right alongside the best performing companies in the oil and gas services industry. We lead the industry in service performance, and achieve over 99% availability across the U.S.

COMPRESSION SERVICES **U.S. COVERAGE MAP**

THE PEOPLE AND TOOLS THAT DELIVER UPTIME

We provide consistent, reliable natural gas compression and related services to oil and gas operations all across the United States. We employ the industry's largest fleet of compressor packages and produce unmatched compression availability to keep your business moving forward.

We are Archrock and our history, through legacy companies, extends more than 65 years, as far back as outsourced natural gas compression itself. As needs and applications for gas compression have evolved over the years, Archrock people have been there making sure our customers experience maximum uptime.

Our customers benefit from the fact that we have the largest fleet in the United States, well-established relationships with OEM manufacturers and distributors, and an unmatched aftermarket parts and service capability. We are strategically located where our clients need us, and offer more operating horsepower and capabilities than any other organization.

This, coupled with our first-in-class customer service, make us the leading provider of natural gas contract compression services, including parts and repair services, in the United States and ensures you benefit from the highest degree of service availability possible.
