

Archrock®

FACT SHEET

For strong, dependable service, our customers count on Archrock. We are a U.S. based energy infrastructure company with a pure-play focus on midstream natural gas compression. Specializing in superior compression services, unmatched technical expertise and an unwavering commitment to safety, we provide consistent, reliable compression and affiliated services to production companies and midstream applications all across the U.S.

We are the market leader in contract compression with a legacy that spans more than 65 years. Headquartered in Houston, Texas, Archrock has approximately 1,700 employees and currently operates more than 3.5 million horsepower.

With extensive expertise and the largest footprint in the country – we can serve our clients in a way no other company can.

Providing custom gas compression solutions and unmatched availability under the safest conditions, our highly-trained field technicians are strategically located in every significant producing region in the U.S. With Archrock, you can be sure we are where you need us.

CONTRACT COMPRESSION SERVICES

Archrock owns, operates, services and maintains natural gas compression equipment. We provide contract compression services, helping to maximize uptime for our customers.

Our compression services provide customers with increased financial and operational flexibility, allowing them to lock in monthly compression services costs and make capital investments elsewhere in their businesses. We offer a variety of contract compression solutions – from maintenance, overhauls, labor and monthly payments – all individualized to meet specific customer needs.

Archrock built its reputation by reliably and safely operating the largest fleet of contract compression equipment in the United States. We are a company of natural gas compression experts, strategically combining technologies, products and services to provide exceptional service, offering our customers more confidence with less risk.

ARCHROCK HELPS MAXIMIZE UPTIME AND IMPROVE SERVICE AVAILABILITY BY OFFERING:

- Unrivaled 99% UPTIME of compression service availability in U.S. operations*
- Inventory of compressor packages ready for deployment
- Comprehensive fleet with the newest technology from an aggressive and continuous new build program
- Environmental services to assist with regulatory compliance
- Single source for quality equipment, technicians & data management software to deliver better equipment, reliability, performance & run times
- Turnkey services from installation and equipment optimization to maintenance
- Highly skilled technicians to help optimize performance & maximize uptime
- Multiple field shops located throughout the United States for quick maintenance
- Quick delivery & start-up

FIELD SERVICE EXPERTS

Archrock leads the industry in preventive maintenance schedules with some of the industry's most qualified and highly skilled field service technicians (FSTs). While many of Archrock's field service technicians are CAT certified,* all field service technicians are fully certified ARIEL graduates who continually take GE Waukesha factory training. Our on-call comprehensive team of technicians are knowledgeable, accessible and experts in their understanding of safety, environmental constraints, operating procedures, best practices and have an overall safety record above the national average.** Archrock's use of industry best-practices help keep operations running smoothly and at optimal performance..

Archrock has over 1000 FSTs placed in strategic concentrations within every significant producing region throughout the United States. This allows us to get to our customers quickly, usually within a few hours of a service call, but almost always within one day.*

* self-reported 2015

** as reported by the National Safety Council

AFTERMARKET SERVICES

Archrock's Aftermarket Services help extend the life of your assets and maximize your investment by lowering the lifecycle cost of your equipment.

Oil & gas operations require reliable gas compression, and Archrock provides the expertise and responsive services to maintain your equipment – helping to optimize and maximize production. Archrock's commitment to superior service at the local level is the foundation of our Aftermarket Services, which is why we operate shops and employ field service technicians throughout the United States. We're wherever you need us.

PARTS & SERVICE

Archrock maintains ready inventories of critical parts strategically located throughout the United States allowing for quicker access, solving operating issues faster than our competitors and reducing downtime. Through Field Services, Shop Services and Contract Maintenance, Archrock has the equipment and services needed for maintenance, repair, recondition and overhaul of most brands of equipment to keep production flowing and in compliance.

We offer a variety of aftermarket solutions for customer-owned gas compression equipment, routine maintenance, overhauls, parts and preventative maintenance parts kits.

Archrock®

We Power America.
Efficiently. Expediently. Continuously.
