We're Driven to Propel Your Productivity

Energy booms come and go, populations ebb and flow, and processes evolve. But through it all, Archrock maintains its strong presence at the top of the compression service business to serve you wherever you are. We operate the most horsepower in the nation, providing ever more efficient and productive compressor packages. We maintain a robust roster of the most experienced, highly trained and strategically positioned field technicians and other service personnel, all with safety at the forefront. Our safety program focuses on ensuring an incident-free workplace is a critical factor in all we do, in the shop, in the field, on the road, everywhere.

All Archrock employees are trained to execute their jobs with our customers' business goals front and center, and to work safely at all times. We work to ensure your repairs are done right the first time and the parts you need are always at hand. That's how we deliver your uptime.

OEM REPRESENTATIVE FOR:

- Air-X
- Ajax
- Altronic
- Ariel
- Caterpillar
- Dresser-Rand
- Frick
- GE Gemini
- Ingersoll-Rand
- Kimray

Archrock is a platinum participant in GE's Gas Compression Power Packager Program. This means we can provide customers with faster access to genuine Waukesha factory parts and expertly trained technicians.

We Power America.

Efficiently.
Expediently.
Continuously.

CUSTOM SOLUTIONS AND RESPONSIVE, COMPREHENSIVE SUPPORT

Archrock provides the services needed to keep gas compressor fleets working, from emergency call-out repairs to preventive maintenance to field overhauls. As the company with the largest fleet of compression equipment in the United States, we are experienced and adept at maintaining and repairing compression assets.

PARTS SERVICES

Since your business is our priority, Archrock makes sure you have access to the full range of parts needed for maintenance, repair and overhaul of your oil & gas compression equipment. We do this by maintaining large inventories in or near every major oil & gas producing region in the U.S. We can even keep your most used parts readily available on your location.

For your natural gas compressors and gas powered industrial engines, we offer new, used, remanufactured, OEM and aftermarket parts. In fact, we are a distributor for a wide range of OEMs.

Archrock offers more than warehouses full of gas compression valve parts and natural gas compression fittings. Together, we'll develop a custom solution to manage your parts needs, starting with spares supply for planned maintenance and contingencies.

FIELD SERVICES

Maximizing the uptime for customers requires flexible, versatile and highly skilled field service technicians as well as firm preventive and predictive maintenance practices. When you partner with Archrock, you can expect responsive compressor service, expert diagnosis, readily available parts support and official documentation of work, all providing you industry-leading uptime.

Whether you need a more thorough, planned, gas compression maintenance schedule, a complete compressor overhaul, or a swing engine analysis, no one is better equipped, as well-trained or more strategically positioned than Archrock.

REPAIR, OVERHAUL AND REMANUFACTURE FOR UPTIME

Engine overhauls

SHOP SERVICES

From repairing functional issues to a complete overhaul, Archrock's shop services teams can rework your equipment to ensure it is operating at peak performance. Here you will find the industry's most experienced team of engineers, technicians and service professionals, most of whom have spent time in the field and on location. They know what is demanded of your engines and compressors, as well as what they're up against. Whether you need a compressor repaired, revamped or rebuilt; or you have valves that need to be analyzed, or an engine overhauled; whatever you need to get you the compression you require for optimum productivity, turn to the team that daily maintains and optimizes the largest compressor fleet in the nation.

Everyone on the Archrock team understands your priorities. You have business to conduct and production numbers to meet, and every minute your equipment is down is costly. Which is why you turn to Archrock. No team is better equipped to handle your maintenance and repair needs.

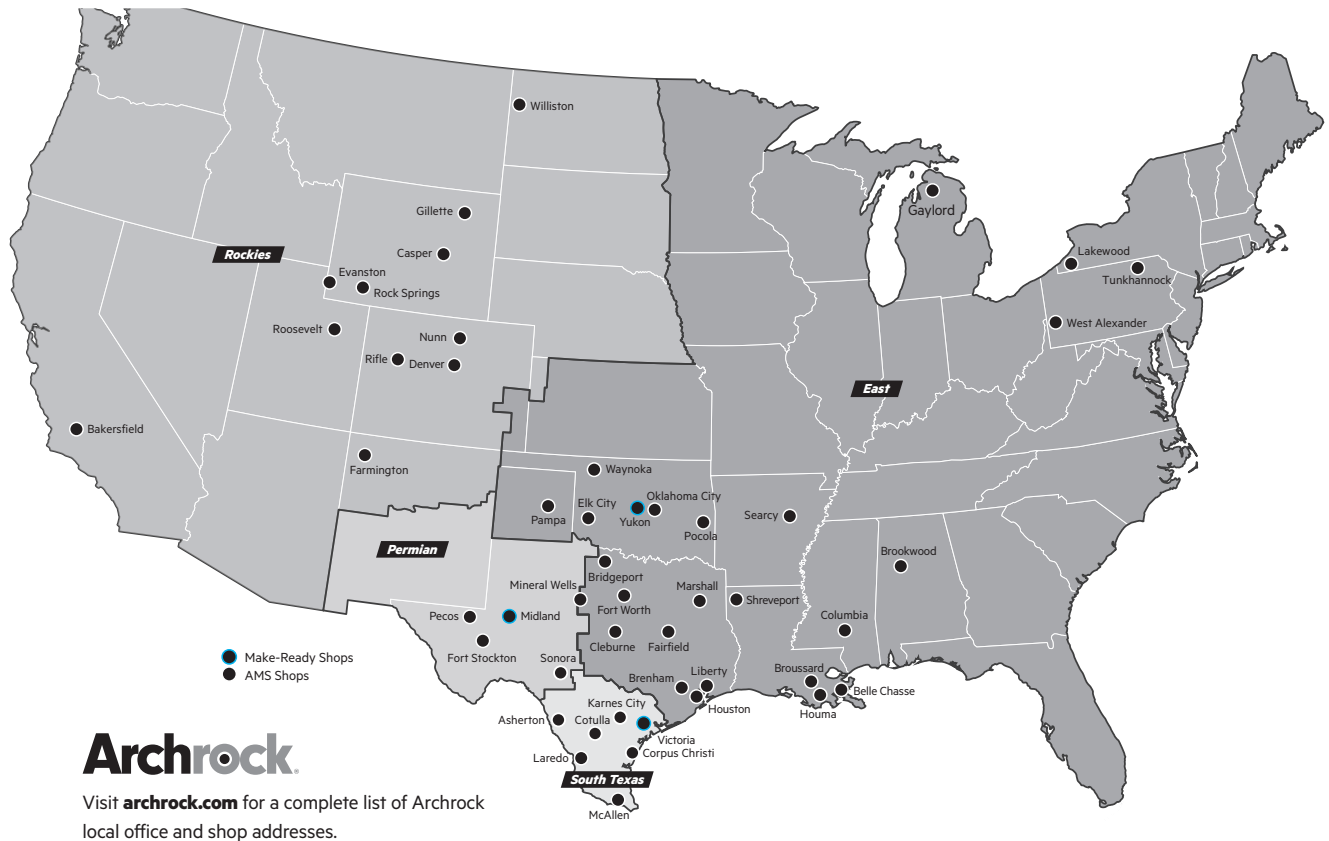

OUR TIME IS YOUR UPTIME®

PEOPLE • POWER • PARTNERSHIP

AFTERMARKET SERVICES **U.S. COVERAGE MAP**

THE PEOPLE AND TOOLS THAT DELIVER UPTIME

We provide consistent, reliable natural gas compression and related services to oil and gas operations all across the United States. We employ the industry's largest fleet of compressor packages and produce unmatched compression availability to keep your business moving forward.

We are Archrock and our history, through legacy companies, extends more than 65 years, as far back as outsourced natural gas compression itself. As needs and applications for gas compression have evolved over the years, Archrock people have been there making sure our customers experience maximum uptime.

Our customers benefit from the fact that we have the largest fleet in the United States, well-established relationships with OEM manufacturers and distributors, and an unmatched aftermarket parts and service capability. We are strategically located where our clients need us, and offer more operating horsepower and capabilities than any other organization.

This, coupled with our first-in-class customer service, make us the leading provider of natural gas contract compression services, including parts and repair services, in the United States and ensures you benefit from the highest degree of service availability possible.
