14 Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action in 2015. Archrock, Inc. 15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis. AROC currently estimates that approximately eighty-eight (88) percent of each of the quarterly cash distributions it paid in 2015 will be classified as non-dividend distributions and treated as a return of capital to the extent of the shareholders' tax basis in AROC shares. Any amount of non-dividend distributions received by a shareholder that is in excess of that shareholder's tax basis in AROC shares will be taxed as a capital gain for U.S. income tax purposes.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates. Based upon calculations using reasonable assumptions, AROC does not believe that it had any accumulated earnings and profits as of the end of 2014 and is estimating that it had current year earnings and profits in 2015 equal to approximately twelve (12) percent of the cash distributions paid to shareholders in 2015.
